

SURFACE SPRAY COMMERCIAL GRADE DISINFECTANT & PROTECTANT

DISINFECTS & PROTECTS

Our Surface Disinfectant and Sanitiser Spray is a simple and effective way to kill bacteria and protect surfaces. It eliminates odour-causing bacteria and inhibits mould and mildew.

Our Surface Disinfectant and Sanitiser Spray will destroy bacteria on the treated surface. Allowing the product to dry will also coat the surface with a microscopic protective layer for continuous protection of up to 24 hours. It is ideal for use around children, pets and plants.

**up to 24 hours

SURFACE SPRAY COMMERCIAL GRADE DISINFECTANT & PROTECTANT

KILLS 99.99% OF PATHOGENS

Our Surface Disinfectant and Sanitiser Spray is a broad spectrum commercial grade surface disinfectant that kills > 99.99% of bacteria, and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation).

BONDS TO SURFACES

Our Surface Disinfectant and Sanitiser Spray is applied wet onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, our Surface Disinfectant and Sanitiser Spray does not leach from (or leave) the treated surface, it does not deplete in microbial efficacy, create a field of inhibition or promote microbial resistance.

NON-STOP PROTECTION

Through a bio mechanical process, the electrostatic charge interacts with the bacteria lipid layer, resulting in permanent destruction of the bacterial cell. Because the organo silane isn't consumed in the disinfection process, it remains ready to continually defend treated surfaces against contamination and bio film formation.

BROAD SPECTRUM

Our Surface Disinfectant and Sanitiser Spray has been tested against a wide range of pathogens include Legionella, E. coli, Pseudomonas, Staphylococcus aureus, Enterococcus Hirare, Salmonella and Aspergillus Niger. Our Surface Disinfectant and Sanitiser Spray commercial grade surface disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

HUMAN FRIENDLY / ECO FRIENDLY

Our Surface Disinfectant and Sanitiser Spray is smarter clean, being convenient to use, sustainable, non-leaching, long lasting and above all, friendly to humans, pets and plants. Our Surface Disinfectant and Sanitiser Spray contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds and in final life, breaks down to form harmless organic compounds.
