

Termidor® HE

We've done the numbers for you

Professional & Specialty Solutions

Increased productivity

Termidor® HE by the numbers

Shorten your termite treatments by an average of **2 hours** with Termidor HE due to the reduced drilling and trenching required. Over 100 jobs, that's an additional **5 weeks** of extra productivity time you never had.

Reduced equipment wear and tear

Termidor® HE by the numbers

With less drilling involved when using Termidor HE, you'll extend the life of your drill bits and drilling equipment which could **save you over \$2,500** in replacement equipment per year.

3 These calculations are based on average size home that has a 70 linear meter external perimeter that requires 50% drilling and 50% trenching with a standard footing depth of 200m.

Drilling efficiencies

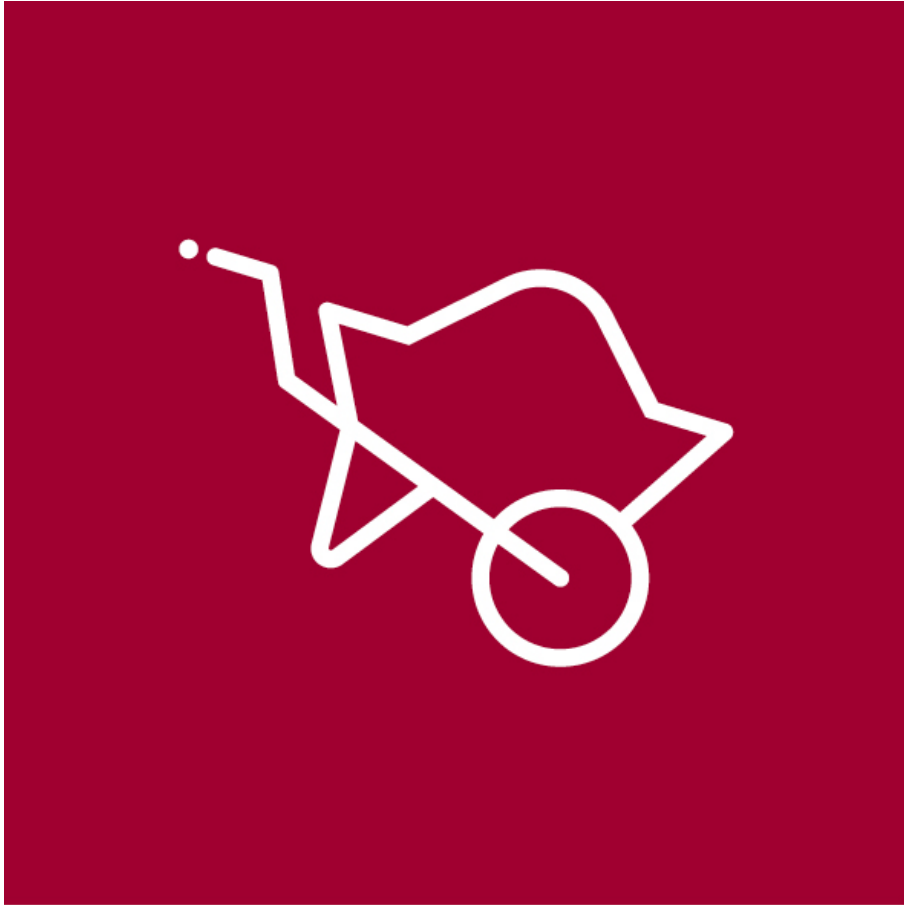

Termidor® HE by the numbers

Termidor HE's enhanced soil mobility allows you extend your drill hole spacings up to 450mm apart, saving you from drilling over 100 holes per job. Over 100 jobs, that's **10,000 less holes** you need to drill, fill or plug.

Less trenching required

Termidor[®] HE by the numbers

Termidor HE allows you to dig shallower trenches which could save you digging and back filing an average of half a cubic metre of soil on every job. Over 100 jobs, that's **50 cubic metres** or over **500 wheelbarrows**.

Water-saving technology

Termidor[®] HE by the numbers

Due to Termidor HE's unique polymer technology you can **reduce your water usage by 50%** when compared to industry standard treatments, that's almost 200L of water savings per job and 50% less application time.

Cost per lineal metre

Termidor® HE by the numbers

A superior **Termidor HE** treatment can be achieved for as little as **\$4-5 per lineal metre** in additional chemical cost when compared to a Termidor SC treatment.

A small cost to pass on when you consider the significant business efficiencies gained and the improved job quality provided to your customer.
